Offer

Unique provider of the most accepted VDA QMC trainings

QFD Engineering Consulting Office was established in 2003 with the purpose of offering a comprehensive solution to companies in Hungary and in the surrounding countries for the development and operation of management systems and to satisfy related training needs. The primary profile of our company includes system development consultancy and training, related to automotive quality management systems and integrated systems. We are proud of being the official license partner of VDA QMC (Quality Management Center of the German Automotive Association) since September 1, 2011, thus we are authorized to provide VDA QMC training sessions that are recognized by the German automotive companies. Our skilled trainers have been approved by VDA QMC, which guarantees that the level of our training sessions matches that of the originals. • IATF 16949 1st and 2nd party (internal) auditor training with certified exam • VDA 6.3 process auditor training with certified exam • FMEA - Failure Mode and Effect Analysis, Special characteristics • Supplier requirements
