- Wednesday 09:00 - 10:45

Description

SurTec develops, manufactures and supplies chemical specialities for surface finishing. With its four fields of application - Industrial Parts Cleaning, Metal Pre-treatment, Functional and Decorative Electroplating - SurTec offers a highly comprehensive portfolio in this sector. SurTec supplies almost all segments dealing with surface treatment, including automotive, aerospace, construction/architecture, household, electronics, renewable energies, and mechanical engineering industries.

Offer

Industrial Parts Cleaning

Industrial Parts Cleaning is one of three core areas of expertise at SurTec. Striving for optimum cleaning can lead to significant advantages in the whole chain of a production process. Choosing the best cleaning agent allows new substances to be integrated and enables more complex components, higher-quality structures or more sophisticated production methods to be introduced. Cleaning processes are also playing an increasingly important role in improving efficiency by maximising the reliability of processes, ensuring low rework rates and optimising costs.

Cooperation Offered

1. Technical co-operation
2. Sales / Distribution

Offer

Metal Pre-treatment

The profile of specifications for Metal Pre-treatment has undergone significant changes in recent years. Process reliability, cost factors and in particular universal quality standards are becoming increasingly important. Nowadays these are the most important factors that enable coaters to differentiate themselves and shape their profile versus competition in their particular field of application.

Cooperation Offered

1. Technical co-operation
2. Sales / Distribution

Offer

Functional Electroplating

Innovation is often described as "reaching new goals by new means." For SurTec innovation also means re-evaluating existing processes and realising dedicated improvements for leading-edge applications.

Cooperation Offered

1. Technical co-operation
2. Sales / Distribution

Offer

Decorative Electroplating

Aesthetic and decorative surfaces give a high-quality appearance to many everyday items. Surfaces need to look high-end and stylish as well as restrained and elegant. This applies for a wide variety of objects such as door knobs, fuel tank caps, faucets, radiators and office furniture. These are just a few examples of decorative elements that might sometimes even act as a signature for a particular manufacturer's brand.

Cooperation Offered

1. Technical co-operation
2. Sales / Distribution
